## \* Introduction of Entrepreneur \*

Signature of  
Entrepreneur.

Name of Entrepreneur - Samadhan Ganesh Shinde.

Qualification - M.A.

Age - 35 years.

Samadhan Shinde is an Entrepreneur. He is the owner of Vighnaharta Enterprises. They make household furniture - yes like bed, chair, table, sofa etc. They also make wooden doors and frames of the doors. They are serving in Nashik since 2012. Samadhan Shinde took the business from his father and reached it on higher height with his hardwork and intelligence. He is still working to take it on higher peaks.

## \* Interview of Entrepreneur \*

### 1. Why did you start your business?

→ Doing business was my passion and my dream from my childhood days. The concept of business is not new for me, my father was also a businessman, so since my childhood I am known to business. And, doing a business gives you freedom as well as many benefits. For example, By doing your own business you will be your own boss. You do not have to follow anyone's instructions or work according to them. You can follow your own rules and regulations, you can work the way you want. Starting and running a business can be a challenging but rewarding experience that offers opportunities and professional growth. Overall, doing business can offer financial, personal and other benefits while providing opportunities for growth and innovation. So due to all these reasons I think business is 10x times better than doing a job under someone.

### 2. Why did you select this business?

→ The reason behind selecting this business is that my father is doing the same business from my childhood so I have witnessed all the small and big things related to this business. And my father also guided me

Whenever I need a guidance, he is still doing that. In short, this business was easier for me to do than looking for new business and shifting on it. The one who wants to start a business, first find a business which you have knowledge about. If you do not have such a business then only look for a new business.

### 3. What products do you manufacture ?

→ Generally, we make household furnitures like sofa, bed, table, chair, doors, frames and other wooden and plywood things.

### 4. Where do you get raw-materials from ?

→ The product which we make are made by two raw-materials mainly - 1. Ply - 2. Wood. Ply is used to make bed and cupboards, wood is used to make doors and frames of the doors. We get ply from factories and we get woods by demolishing the old wooden homes. The other things which are needed for our work are got by hardware shops. We have the skilled workers who make these wonderful furniture things.

### 5. How is your business going?

→ It is going very well. We are making sufficient profits from our business. We sell our products wholesale and retail. Our products are sold in many districts. We are also making an ecosystem for our business. We are planning and also working on to sell our products out of Maharashtra.

### 6. Who is your role model?

→ For me my role model is my father. Because I have learnt a lot from him. He is a hardworking man. He is an illiterate man but still he reached here at this level. He had nothing when he started, he had zero but still by his hard-work and intelligence he managed to reach this level. My father is not only a role model for me but he is an inspiration for me. I also want to do the same things as my father did and I will take this business on higher heights.

### 7. What problems and difficulties did you get in your business?

→ Problems and solutions are the part of life. Everyone faces problems while doing something. I have also faced some problems like availability of raw materials. Sometimes we do not get raw materials so we have to get it from somewhere else so in such time it becomes expensive. The major problem we have faced or that we have to face is finding a good and skilled labour. Finding a skilled labour is a hard task in our field. There is also a ~~pr~~ problem like competition, sometime the other shopkeepers sell their products on cheaper rates so we find troubles related with sells but we tackle the troubles according to us.

8. What is the hardest part of being an entrepreneur?

→ I think the hardest part of being an entrepreneur is taking right decisions. It is a very important thing to take right and favourable decisions. An entrepreneur should first calculate the good and bad impacts of his decisions, prejudge it then only he should take the decisions practically. Everything including small and big things of business depend on the decisions made by entrepreneurs so he should have proper planning and should be prepared for the same.

Q. What according to you are the major pitfalls causing entrepreneurs to fail?

→ There are many major and minor pitfalls which are causing entrepreneurs to fail. The first problem is not having enough money. Most of the businesses do not have capital so they fail, an entrepreneur should first arrange capital for their business, for it they can get a loan or they can start their business in partnership or they can use their own ways. The next thing is not knowing your market. An entrepreneur should know, who are their clients? Who is their competition? What is their target market willing to pay for their product or service? Entrepreneurs must be able to answer those and many more questions about their market in order to run successful business. There are other pitfalls like not having a vision, trying to be everything to everybody, not enough marketing, poor planning, not accepting constructive criticism, not delegating, lack of soft skills. If an entrepreneur really wants to be successful and also make his industry successful then these are the some common things which are causing them to fail in their entrepreneurship so the entrepreneurs have to overcome these small and big pitfalls to make his dreams true and get succeed.

10. What do you think are the essential qualities required for successful entrepreneurs ?

→ First, let me share what I think are qualities in all successful people. Those who are successful in their careers are passionate about their work. They are focused, self-driven and goal oriented. They are positive in their attitude, confident and are hard-working.

Being a successful entrepreneur means having only not the above mentioned but a few other qualities too. Businesses face risks and being an entrepreneur requires the ability to take risk and minimize it. An entrepreneur must be open to learning and stay abreast with the ever changing market and consumer behaviour.

The ability to manage people is important. Building strong relationships with staff, suppliers and customers is important. Managing and maintaining accounts is vital.

I read Robert Kiyosaki's famous book, Rich Dad, Poor Dad and the rich dad's quote stays with me till date. "Starting a business is like jumping out of an airplane without a parachute and hopes it opens before hitting the ground." If one possesses the right attitude, skills can be learnt. Experience makes one rich and works towards making of a successful entrepreneur.

1.1. Please share few lessons which you learnt while taking up entrepreneurship?

→ The journey is as important as the destination and I have learnt a few lessons in my humble journey as an entrepreneur. It is important to be positive and perseverant.

There were times when I doubted myself and my business. Some days were great and some moments were frustrating.

I was on an emotional rollercoaster but knew this was my choice. I would re-look at my business blueprint, reassess the market and stay focused on my goal. It is important to be optimistic, hopeful and believe in you.

It is important to keep an eye on the bottom-line.

Ultimately, all businesses are based on conducted for money. It is vital to not be a victim of overspending on unnecessary startup expenses but use resources in an efficient and effective way for achieving goals.

12. What is the most important thing you have learned as a business owner?

→ The most important thing I have learned as a business owner is the importance of always putting the customer first. It is essential to always keep the customer happy and

satisfied with your product or service in order to maintain a successful business. It is also important to always be innovating and improving your product or service in order to stay ahead of the competition.

13. How have you dealt with failure in your business?

→ I believe that every business owner faces failure at some point in their journey. What is important is how you deal with it. I have always tried to learn from my failures and use them as a stepping stone to success. I think it is important to be honest with yourself about what went wrong and try to find a solution so that you don't make the same mistake again. I also think it is important to share your experiences with others so that they can learn from your mistakes as well.

14. How do you deal with stress?

→ There are a number of ways that I deal with stress. I find that exercise is a great way to relieve stress. I also make sure to spend time with friends and family

and I also make sure to take breaks throughout the day. I find that listening to music or reading can also help me get relief from stress.

### 15. How do you stay motivated?

→ Staying motivated is a very is a very necessary thing for an entrepreneur. You run a business, you employ so many employees, workers so if you give up then where will they go? So it is an important thing. Whenever I get depressed I remember the day ~~is~~ when I started, I look at my achievements and success and say to myself I could do those, there so here also I can do, problems will come and go, it's their work. Our work and duty is to tackle them overcome them and keep growing and other things leave on God, he will lead us to right direction, we just have to keep going and doing our work honestly.

### 16. How do you manage your time and resources?

→ I am very careful with how I spend my time and resources. I always make sure that I am using my time wisely, not investing it on useless, meaningless works

and not wasting any resources. I also have a time-table which I follow to manage my time.

### 17. How do you attract and retain customers?

→ There are many ways to attract and retain ~~ent~~ customers. Some common methods include providing excellent customer service, offering them competitive prices and having a strong marketing strategy.

Customer service is important because it shows customers that you care about their experience with your business. Excellent customer service can help to build trust and loyalty between a customer and a business.

Offering competitive prices is another way to attract and retain customers. Customers are more likely to do business with a company that offers them a good deal. Having a strong marketing strategy is also important in attracting and retaining customers. A good marketing campaign can create awareness of your brand and help to build an emotional connection with your target audience. These are the some major techniques which we use to attract and retain customers.

18. What are your competitive advantages?

→ There are many potential competitive advantages that a business owner could have. Some examples might include:

- A strong and loyal customer base.
- A unique or innovative product or service.
- A proven track record of success.
- A team of experienced and dedicated employees.
- A strategic location.
- Access to important resources or networks.

19. How do you market your business?

→ We generally use word-of-mouth process to advertise or market our products. We also stick stickers of our products in public places. We give cards to our customers so that the cards will be shared to other customers and we get customers. These are the some strategies and techniques which we use to advertise our product and business.

20. What are your responsibilities as an entrepreneur?

→ My responsibility as an entrepreneur is to take the decision favouring my business and lead my team to right direction. Always keep positive attitude in myself and my team. Always keep learning and keep growing. Find the problems which come or will come in future and overcome them. Always look for peak heights and keep growing.

21. What support you expect from the government to be extended to entrepreneurs?

→ We have many taxes, lots of compliances and since these seem to be so complicated a lot of dependence on chartered accountants. Apart from the above mentioned initiatives, the government should be more supportive towards entrepreneurs and simplify processes. The websites should be more interactive with maybe an option for the entrepreneur to ask a specific relevant question after registering and then get an expert, legal advice straight from the department. In last few years small and medium businesses have made the economy of the country stable so the government should also take beneficial steps towards the entrepreneurs.

22. Should the government train students about entrepreneurship?

→ Yes. Of course. The government should definitely launch entrepreneurship training programmes for students in their academic education. Specially, in a country like India which has a population about 1.5 billion, it is not easy for the government to give jobs to everyone so unemployment is growing, if the government starts such programmes and helps entrepreneurship to grow then we will have certainly amazing future results.

23. How does your business look different now vs when you first started?

→ Yes, it is quite changed than before. I started my business 8 years ago with a small shop which I built on a rent land. I had no machineries that time, I had only two workers, they were not too skilled but today by my hardwork and the support of my father and my family and the belief on the god, I own the same land, I have built a big shop on it. I have many machineries in my shop as well as many skilled workers.

24. What are your expansion plans?

→ I have already mentioned about expansion of my business. We are planning to expand our business in various districts and open branches. We are also trying to shift our products on online platforms like Amazon and Flipkart. We are also planning to diversify our product range so that we can offer more products and services to our customers. We have already started on some places executing our plans.

25. What advice would you give to someone considering starting their own business?

→ There are many things to consider before starting your own business. First do your research and develop a solid business plan. This will help to determine if your business is viable and what steps you need to take to get it off the ground.

Make sure you have the financial resources in place to start and sustain your business. This includes having enough savings to cover start-up costs and ongoing expenses as well as securing funding from investors or lenders if needed.

Choose the right business structure for your company. This will impact things like liability, taxes and other legal considerations.

Consider hiring a team of professionals to help you with various aspects of starting and running your business from accounting to legal matters.

Be prepared for long hours and hard work. Starting a business is not a get-rich-quick scheme - it takes time, dedication and perseverance to succeed.

## \* CONCLUSION \*

It was very nice learning experience for me while working on this project. I got to learn the things practically which are in our syllabus by doing this project.

Being an Entrepreneur, one has to achieve some skills to fulfill their goals and develop their business. They have to work hard with intelligence to make their dreams come true. They have to understand all the small and big things related with business to become successful. They have to keep learning and growing in the journey.

A special thanks to our subject teacher Miss. Kedare Mam for giving us this opportunity to make this amazing project. I really got to learn a lot about entrepreneurship by doing this project.
